Proposed acquisition of Downing Renewables & Infrastructure Trust plc

1. Introduction

We, the undersigned, understand that:

- (a) the Offeror intends to make an offer to acquire, directly or indirectly, the entire issued and to be issued ordinary share capital of Downing Renewables & Infrastructure Trust plc ("**DORE**") not already owned by the Bagnall Group, comprising ordinary shares of £0.01 each in the capital of DORE (the "**DORE Shares**") (the "**Proposed Transaction**");
- (b) it is intended that the Proposed Transaction will be implemented by way of a court-sanctioned scheme of arrangement under Part 26 of the Companies Act 2006 (as amended) (the "**Companies Act**") (the "**Scheme**"), but the Offeror has reserved the right to elect to implement the Proposed Transaction by way of a takeover offer, as defined in Chapter 3 of Part 28 of the Companies Act (an "**Offer**"); and
- (c) the Proposed Transaction will be on the terms and conditions to be set out in the announcement of a firm intention to make an offer to be made under Rule 2.7 of the City Code on Takeovers and Mergers (the "**Code**") (the "**Press Announcement**") (substantially in the form which is attached to this undertaking), together with any additional terms and conditions as may be required by the Code and/or any other applicable law or regulation or as the Offeror and DORE may agree.

2. Condition of undertaking

The terms of this undertaking are conditional on:

- (a) the Press Announcement being released not later than 6.30 p.m. (London time) on the Business Day following the date of this undertaking or such later date and/or time as the Offeror and DORE may agree; and
- (b) either the publication of the formal document containing details of the Scheme (the "**Scheme Document**") and the posting of the appropriate form(s) of proxy or the publication of the formal document containing an Offer (the "**Offer Document**") and the posting of the appropriate form(s) of acceptance, in each case within 28 days of the date of publication of the Press Announcement (or such later time as may be agreed by the Panel on Takeovers and Mergers (the "**Panel**")).

3. Warranties and undertakings

3.1. We represent and warrant to and with the Offeror that:

- (a) we have (and will at all relevant times continue to have) full power and authority to enter into this undertaking and perform our obligations under it in accordance with their terms;
- (b) we are the registered holder and/or the beneficial owner and/or the joint beneficial owner of (or are otherwise able to control or direct the exercise of all rights, including voting rights, attaching to, and the ability to procure and/or direct the transfer of) the number of DORE Shares specified in the Schedule (the "**Shares**", which expression will be deemed to include any shares in the capital of DORE: (i) attributable to or derived from the Shares or into which the Shares may be converted, subdivided or consolidated as a result of any reorganisation of the share capital of DORE; and/or (ii) in which we acquire an interest, in each case after the date of this undertaking) and, where stated in column 1 of the table in the Schedule, we are the registered legal owner of the Shares;
- (c) we are able to procure and/or direct the transfer of the Shares free from all liens, equities, charges, encumbrances, options, rights of pre-emption, and any other third party rights and interests of any nature; and
- (d) other than as set out in the Schedule to this undertaking, we do not have any interest (as defined in the Code) in any securities of DORE, or any rights to subscribe for, purchase or otherwise acquire any such securities, or any short positions (within the meaning of the Code) in any such securities.

3.2. We hereby irrevocably and, subject to the terms of paragraph 2 above, unconditionally undertake, unless and until the obligations under this undertaking lapse in accordance with the terms of this undertaking, other than pursuant to the Scheme, we will not (and, if applicable, we will procure that the registered holder of the Shares will not):

- (a) sell, transfer, charge, encumber, pledge or grant any option over or otherwise dispose of, or permit the sale, transfer, charging, encumbrance, pledge, granting of any option over or other disposal of, any of the Shares or any interest in any of the Shares except to the Offeror under the terms of the Proposed Transaction;

- (b) accept or give any undertaking in respect of any other offer or similar transaction in respect of any of the Shares made in competition with, or which might frustrate, the Proposed Transaction or any part of it (whether it is conditional or unconditional and irrespective of the means by which it is to be implemented);
- (c) acquire any further interest in, or otherwise deal or undertake any dealing in, any shares in DORE unless the Panel has first reconfirmed to the Offeror and DORE that we are not acting in concert with the Offeror (and, for the avoidance of doubt, if any such shares, securities or interests are so acquired by us, such shares, securities or interests (as the case may be) shall be deemed to be included in the expression **Shares** for the purposes of this undertaking);
- (d) convene any meeting of the members of DORE in our capacity as a shareholder, nor exercise or permit or direct the exercise of the voting rights attaching to the Shares, in any manner which would or might reasonably be expected to frustrate the Proposed Transaction or prevent the Proposed Transaction from completing; or
- (e) enter into any agreement or arrangement with, or incur any obligation or give any letter of intent to, any person, whether conditionally or unconditionally, or solicit or encourage any person, to do any of the acts referred to in paragraphs 3.2(a) to 3.2(d) or which would preclude us from complying with our obligations under, or the undertakings in, this deed (and, for the avoidance of doubt, references in this paragraph 3.2(e) to any agreement, arrangement, obligation or indication of intent include any agreement, arrangement, obligation or indication of intent whether or not legally binding or subject to any condition or which is to take effect upon or following the lapsing of the Proposed Transaction, the ceasing of this undertaking to be binding or any other event).

4. Scheme

We hereby irrevocably and subject to the terms of paragraph 2 above, undertake, unless the Offeror expressly requests otherwise in writing, to the Offeror that, if the Proposed Transaction is implemented by way of a Scheme:

- (a) we shall exercise or, where applicable, procure the exercise of, all voting rights attaching to the Shares on any resolution (whether or not amended and whether put to a show of hands or a poll) which is proposed at any general or class meeting of DORE (including any adjournment thereof) or at any meeting of holders of shares in DORE convened by a court pursuant to section 896 of the Companies Act (including any adjournment thereof) (any such meeting being a "**Shareholders' Meeting**") which:
 - (i) is necessary to implement the Proposed Transaction;
 - (ii) might reasonably be expected to have any impact on the fulfilment of any Condition (as defined in the Press Announcement) to the Proposed Transaction;

- (iii) might reasonably be expected to impede or frustrate the Proposed Transaction in any way (which shall include any resolution to approve a scheme of arrangement, merger, acquisition or disposal relating to any shares in DORE or any of its subsidiaries, or any asset of DORE or any of its subsidiaries, by a third party); or
- (iv) adjourns a Shareholders' Meeting called in connection with the Proposed Transaction,

in each case, only in accordance with the Offeror's instructions;

- (b) we shall exercise or, where applicable, procure the exercise of, all rights attaching to the Shares to requisition or join in the requisitioning of any general meeting of DORE for the purposes of voting on any resolution referred to under paragraph 4(a), or to require DORE to give notice of any such meeting, only in accordance with the Offeror's instructions;
- (c) the Offeror will acquire the Shares pursuant to the Scheme, which provides for the transfer of the Shares to the Offeror, free from any liens, equitable interests, charges, encumbrances, rights of pre-emption and any other third party rights or interests whatsoever and together with all rights existing at the date of the Press Announcement or thereafter attaching thereto, including (without limitation) the right to receive and retain, in full, all dividends and other distributions (if any) authorised, declared, made or paid or any other return of capital or value (whether by way of reduction of share capital or share premium account or otherwise) made on or after the date of the Press Announcement, other than the DORE Permitted Dividends (as defined in the Press Announcement) and any dividend, other distribution or return of capital or value in respect of which the Offeror exercises its right under the terms of the Proposed Transaction to reduce the consideration payable in respect of each DORE Share;
- (d) for the purposes of voting on any resolution referred to under paragraph 4(a), we shall, if required by the Offeror, execute, or procure the execution of, any form of proxy (or, if applicable, in respect of any Shares held in uncertificated form, take or procure the registered holder to take any action which may be required in order to give valid proxy instructions) required by the Offeror appointing the chair of the relevant Shareholders' Meeting (or such other person as may be named by the Offeror) to attend and vote at the relevant Shareholders' Meeting and we shall not amend, revoke or withdraw any such proxy instruction; and
- (e) without prejudice to paragraphs 4(a) and 4(d), we shall exercise (or procure the exercise of) all voting rights attaching to the Shares to vote in favour of all resolutions to approve the Scheme and/or Proposed Transaction and any related matters proposed at any Shareholders' Meeting, and after the despatch of the Scheme Document to holders of shares in DORE (and without prejudice to any right we have to attend and vote in person at the Shareholders' Meetings to implement the Proposed Transaction (including any adjournment thereof)):

- (i) in the case of those Shares referred to in the Schedule, as soon as reasonably practicable and in any event no later than 5.00 p.m. on the tenth Business Day after the date of the Scheme Document; or
- (ii) in the case of any other Shares, by the earlier of: (A) 5.00 p.m. on the tenth Business Day after the date on which we become able to control the exercise of all rights, including voting rights, attaching to those Shares; and (B) the latest time allowed for the lodging of proxies for the relevant Shareholders' Meeting,

return, or procure the return of, if applicable, the signed forms of proxy enclosed with the Scheme Document (completed and signed and voting in favour of the resolutions to implement the Proposed Transaction) in accordance with the instructions printed on those forms of proxy and, if applicable, in respect of any Shares held in uncertificated form, take or procure the taking of any other action which may be required by or on behalf of the Offeror or its nominated representative in order to make a valid proxy appointment and give valid proxy instructions (voting in favour of the resolutions to implement the Proposed Transaction); and

- (f) without prejudice to paragraph 4(a), we shall not revoke or amend any proxy submitted in accordance with paragraph 4(e) above (or procure or permit and/or direct any of the forgoing) and shall not, without the Offeror's prior written consent, submit (or procure or permit and/or direct the submission of) any new form of proxy or other proxy instruction, in each case whether in writing or by attendance at any Shareholders' Meeting.

5. Offer

We hereby irrevocably and, subject to the terms of paragraph 2 above, unconditionally undertake to the Offeror that, if the Proposed Transaction is implemented by way of an Offer:

- (a) upon the Offer being made, we will accept or, where applicable, procure the acceptance of the Offer in respect of the Shares and, should the Offer be declared unconditional in accordance with the requirements of the Code, transfer the Shares free from any liens, equitable interests, charges, encumbrances, rights of pre-emption and any other third party rights or interests whatsoever and together with all rights existing at the date of the Press Announcement or thereafter attaching thereto, including (without limitation) the right to receive and retain, in full, all dividends and other distributions (if any) authorised, declared, made or paid or any other return of capital or value (whether by way of reduction of share capital or share premium account or otherwise) made on or after the date of the Press Announcement, other than the DORE Permitted Dividends (as defined in the Press Announcement) and any dividend, other distribution or return of capital or value in respect of which the Offeror exercises its right under the terms of the Proposed Transaction to reduce the consideration payable in respect of each DORE Share;

(b) we shall exercise or, where applicable, procure the exercise of, all rights attaching to the Shares on any resolution (whether or not amended and whether put to a show of hands or a poll) which is proposed at any Shareholders' Meeting (including any adjournment thereof) which might reasonably be expected to:

- (i) impact on the fulfilment of any Condition (as defined in the Press Announcement) to the Proposed Transaction; or
- (ii) impede or frustrate the Proposed Transaction in any way (which shall include any resolution to approve a scheme of arrangement, merger, acquisition or disposal relating to any shares in DORE or any of its subsidiaries, or any asset of DORE or any of its subsidiaries, by a third party),

only in accordance with the Offeror's instructions;

(c) we shall, after the despatch of the Offer Document to holders of DORE Shares:

- (i) in the case of those Shares referred to in the Schedule, as soon as reasonably practicable and in any event no later than 5.00 p.m. on the tenth Business Day after the date of the Offer Document; or
- (ii) in the case of any other Shares, by the earlier of: (A) 5.00 p.m. on the tenth Business Day after the date on which we become able to control the exercise of all rights, including voting rights, attaching to those Shares; and (B) the latest time allowed for accepting the Offer,

duly accept (or procure the acceptance of) the Offer in accordance with its terms in respect of such Shares; and

(d) notwithstanding that the terms of the Offer Document may confer rights of withdrawal on accepting shareholders, we shall not withdraw any acceptance of the Offer in respect of the Shares or any of them and shall procure that no rights to withdraw any acceptance in respect of such Shares are exercised,

provided that this paragraph 5 shall not be binding on us unless the financial terms of the Offer are at least as favourable as the terms of the Scheme (as set out in the Press Announcement).

6. Publicity and provision of information

6.1. We acknowledge that, in accordance with:

- (a) Rule 2.10 of the Code, particulars of this undertaking will be disclosed in the Press Announcement;
- (b) Rule 24.3 of the Code, particulars of this undertaking will be included in the Scheme Document and/or the Offer Document (as applicable); and

- (c) Rule 26.1 of the Code, this undertaking will be published on a website following release of the Press Announcement.

6.2. We consent to:

- (a) the issue of the Press Announcement with the references to us and this undertaking substantially in the form and context in which they appear in the form of the Press Announcement attached to this undertaking;
- (b) the despatch of the Scheme Document and/or Offer Document (as applicable) containing particulars of this undertaking and, if required, details of our interests and dealings in DORE securities as required by the Code; and
- (c) this undertaking being published on a website following release of the Press Announcement.

6.3. By no later than close of business on the fifth Business Day before the publication date of the Scheme Document or the Offer Document (as applicable), we will supply to DORE or the Offeror (as applicable) all information required to be included in the Scheme Document or the Offer Document (as applicable) concerning us, including but not limited to:

- (a) our interests in securities of the Offeror and DORE; and
- (b) all of our dealings in securities of the Offeror and DORE since commencement of the offer period (as defined in the Code).

6.4. We will notify the Offeror or ensure that the Offeror is notified promptly of any dealings by us in securities of the Offeror and/or DORE after the date of this undertaking and before the obligations under this undertaking lapse in accordance with the terms of this undertaking.

7. Announcing and proceeding with the Proposed Transaction

We acknowledge that:

- (a) the release of the Press Announcement is at the Offeror's absolute discretion and the Offeror reserves the right not to release the Press Announcement; and
- (b) nothing in this undertaking obliges the Offeror to announce or proceed with the Scheme or the Offer, or to despatch the Offer Document, if it is not required to do so under the Code.

8. Lapse of undertaking

8.1. All obligations under this undertaking will lapse and cease to have any effect, to the extent not already fulfilled and without prejudice to any accrued rights or liabilities in respect of an antecedent breach:

- (a) immediately if the Offeror announces, with the consent of the Panel, that it does not intend to proceed with the Proposed Transaction; or

- (b) on and from the earlier of:
 - (i) the Scheme (if applicable) becoming effective in accordance with its terms, or (if the Proposed Transaction proceeds by way of an Offer), the Proposed Transaction is declared unconditional in accordance with the requirements of the Code;
 - (ii) the Long Stop Date (as defined in the Press Announcement); and
 - (iii) the time and date on which the Proposed Transaction is withdrawn, lapses or otherwise terminates in accordance with its terms (provided that (i) the reason is not because the Offeror has elected to proceed by way of an Offer rather than by way of a Scheme or vice versa; and/or (ii) no new, revised or replacement Proposed Transaction in accordance with Rule 2.7 of the Code is announced by the Offeror at the same time); or
- (c) if at any time prior to the Scheme becoming effective or the Takeover Offer becoming unconditional (as applicable):
 - (i) a third party (the "**Competing Bidder**") announces, in accordance with Rule 2.7 of the Code, a firm intention to acquire the issued and to be issued ordinary share capital of DORE not already owned by the Competing Bidder (to be implemented whether by a Scheme or an Offer) for an amount of consideration that is equal to or higher than an amount that is 10 per cent. more than the consideration under the Proposed Transaction (a "**Superior Proposal**"); and
 - (ii) the Offeror does not increase the consideration offered under the Proposed Transaction to an amount which represents an offer value equal to or higher than the consideration offered pursuant to the Superior Proposal by 11.59 p.m. (UK time) on the fifth Business Day after the date of the firm intention announcement by the Competing Bidder,

and, in the event that some or all of the consideration pursuant to the Superior Proposal includes non-cash consideration, such as shares or other securities, the amount of consideration offered under the Superior Proposal for the purposes of this paragraph 8.1(c) shall be as determined by DORE's board of directors (acting reasonably), having taken advice from DORE's financial advisers and announced such determination by way of a Regulatory News Service.

- 8.2. If our obligations in this undertaking lapse, we shall have no claim against the Offeror and the Offeror shall have no claim against us, other than in respect of any prior breach of any of the terms of this undertaking.

9. Notices

- 9.1. Any notice, demand or other communication given or made under or in connection with the matters contemplated by this deed shall be in writing and shall be delivered personally or

sent by prepaid first class post (or, if posted to or from a place outside the United Kingdom, airmail) or email:

and shall be deemed to have been duly given or made as follows:

- (a) if personally delivered, upon delivery at the address of the relevant party;
- (b) if sent by first class post, within the United Kingdom, the Business Days after the date of posting;
- (c) if sent by air, mail, three Business Days after the date of posting; and
- (d) if sent by email, on transmission,

provided that if, in accordance with the above provisions, any such notice, demand or other communication would otherwise be deemed to be given or made after 6.00 p.m. on a Business Day such notice, demand or other communication shall be deemed to be given or made at 9.00 a.m. on the next Business Day.

9.2. A party may notify the other party to this deed of a change to its name, relevant addressee or address(es) for the purposes of paragraph 9.1 provided that such notification shall only be effective on:

- (a) the date specified in the notification as the date on which the change is to take place; or
- (b) if no date is specified or the date specified is less than five Business Days after the date on which notice is given, the date falling five Business Days after notice of any such change has been given.

10. General

- 10.1. By way of security for our obligations under this undertaking we irrevocably appoint, severally, each of the Offeror and any director of the Offeror to be our attorney to, in our name and on our behalf, if we fail to comply with any of the undertakings in paragraphs 4 and 5 within the specified period, sign, execute and deliver any documents and do all such acts and things as may be necessary for or incidental to the performance of our obligations under this undertaking and we irrevocably undertake to ratify such act if called upon to do so. We agree that this power of attorney is irrevocable in accordance with section 4 of the Powers of Attorney Act 1971 until this undertaking lapses in accordance with paragraph 8.
- 10.2. If any of the Shares are not registered in our name, we will procure that the registered holder(s) of those Shares act in accordance with the terms of this undertaking.
- 10.3. We acknowledge that, if we breach any of our obligations in this undertaking, damages may not be an adequate remedy and that an order for specific performance or other equitable remedy may be the only adequate remedy for that breach.
- 10.4. Any reference to a time, date or period in this undertaking is a reference to London time and may be extended by mutual agreement between the parties but, as regards any time, date or period originally fixed or so extended, time will be of the essence.
- 10.5. No term of this undertaking is enforceable under the Contracts (Rights of Third Parties) Act 1999 by a person who is not a party to it.
- 10.6. The *ejusdem generis* principle of construction shall not apply to this undertaking. Any phrase introduced by the terms "other", "including", "include" and "in particular" or any similar expression shall be construed as illustrative and shall not limit the sense of the words following or preceding those terms.
- 10.7. No variation of this undertaking shall be effective unless agreed in writing by us and the Offeror.
- 10.8. In this undertaking:
- (a) a reference to a "**Business Day**" means a day (other than a Saturday or Sunday or public holiday) on which banks are generally open in London for normal business;
 - (b) a reference to a person having an "**interest in shares**" includes all interests which a person would be required to notify to DORE if they were a director of DORE;
 - (c) the expression the "**Proposed Transaction**" extends to any improved or revised offer announced by or on behalf of the Offeror during the offer period, whether voluntary or mandatory, irrespective of how the improved or revised offer is to be implemented, provided that the terms of such offer are no less favourable to DORE's shareholders than the terms set out in the Press Announcement and, for

the avoidance of doubt, this undertaking will continue to be binding in respect of the Shares in respect of any improved or revised offer;

- (d) the expression "**acting in concert**" has the meaning given to it in the Code; and
- (e) any capitalised term used but not defined in this undertaking shall have the meaning given to it in the Press Announcement.

- 10.9. We accept, acknowledge and confirm that we have been given adequate opportunity to consider whether or not to enter into this undertaking and to obtain independent legal advice accordingly.
- 10.10. This undertaking and any non-contractual obligations arising out of or in connection with it, its subject matter or formation will be governed by, and construed in accordance with, English law.
- 10.11. The English courts have exclusive jurisdiction to settle any dispute, claim or controversy arising out of or in connection with this undertaking, its subject matter or formation (including a dispute, claim or controversy relating to any non-contractual obligations arising out of or in connection with this undertaking) and we irrevocably submit to the exclusive jurisdiction of the English courts for all purposes in relation to this undertaking.

APPENDIX
PRESS ANNOUNCEMENT

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998 (Department of Health 1999). The number of people in the public sector who are employed in health care has increased by 1.2 million, from 1.3 million in 1980 to 2.5 million in 1998 (Department of Health 1999).

There is a growing emphasis on the need to improve the quality of health care and to ensure that the public sector is able to meet the needs of the population. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which sets out the framework for the regulation of health care. The Act requires health care providers to ensure that they meet certain standards of quality and safety, and to be subject to external regulation.

The Health Care Act 1999 also requires health care providers to be transparent about their performance and to be held accountable for their actions. This has led to the introduction of a number of measures, including the requirement for health care providers to publish information about their performance and to be subject to external audit.

The Health Care Act 1999 also requires health care providers to be subject to external regulation. This has led to the introduction of a number of regulatory bodies, including the Health Care Commission, which is responsible for regulating the quality of health care in the public sector. The Health Care Commission has a number of functions, including the monitoring and evaluation of health care providers, the investigation of complaints, and the promotion of good practice.

The Health Care Act 1999 also requires health care providers to be subject to external regulation. This has led to the introduction of a number of regulatory bodies, including the Health Care Commission, which is responsible for regulating the quality of health care in the public sector. The Health Care Commission has a number of functions, including the monitoring and evaluation of health care providers, the investigation of complaints, and the promotion of good practice.

The Health Care Act 1999 also requires health care providers to be subject to external regulation. This has led to the introduction of a number of regulatory bodies, including the Health Care Commission, which is responsible for regulating the quality of health care in the public sector. The Health Care Commission has a number of functions, including the monitoring and evaluation of health care providers, the investigation of complaints, and the promotion of good practice.

The Health Care Act 1999 also requires health care providers to be subject to external regulation. This has led to the introduction of a number of regulatory bodies, including the Health Care Commission, which is responsible for regulating the quality of health care in the public sector. The Health Care Commission has a number of functions, including the monitoring and evaluation of health care providers, the investigation of complaints, and the promotion of good practice.

The Health Care Act 1999 also requires health care providers to be subject to external regulation. This has led to the introduction of a number of regulatory bodies, including the Health Care Commission, which is responsible for regulating the quality of health care in the public sector. The Health Care Commission has a number of functions, including the monitoring and evaluation of health care providers, the investigation of complaints, and the promotion of good practice.

The Health Care Act 1999 also requires health care providers to be subject to external regulation. This has led to the introduction of a number of regulatory bodies, including the Health Care Commission, which is responsible for regulating the quality of health care in the public sector. The Health Care Commission has a number of functions, including the monitoring and evaluation of health care providers, the investigation of complaints, and the promotion of good practice.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There are a number of reasons why the world population is growing so rapidly. One of the main reasons is that the number of children born to each woman has increased. In 1980, the average woman in the world had 2.5 children. In 1999, the average woman in the world had 2.7 children. This is a small increase, but it is enough to make a big difference over time.

Another reason why the world population is growing so rapidly is that the number of people who are surviving to old age has increased. In 1980, the average person in the world lived for 55 years. In 1999, the average person in the world lived for 65 years. This is a big increase, and it means that there are more people in the world who are old enough to have children.

There are also a number of other reasons why the world population is growing so rapidly. For example, the number of people who are moving from rural areas to cities has increased. This is because there are more jobs in cities, and cities are more attractive than rural areas. This means that there are more people in cities, and cities are growing faster than rural areas.

Finally, there are a number of other factors that are contributing to the rapid growth of the world population. For example, the number of people who are surviving to old age has increased. This is because there are more people who are surviving to old age, and this means that there are more people in the world who are old enough to have children.

There are a number of other factors that are contributing to the rapid growth of the world population. For example, the number of people who are surviving to old age has increased. This is because there are more people who are surviving to old age, and this means that there are more people in the world who are old enough to have children.

There are a number of other factors that are contributing to the rapid growth of the world population. For example, the number of people who are surviving to old age has increased. This is because there are more people who are surviving to old age, and this means that there are more people in the world who are old enough to have children.

There are a number of other factors that are contributing to the rapid growth of the world population. For example, the number of people who are surviving to old age has increased. This is because there are more people who are surviving to old age, and this means that there are more people in the world who are old enough to have children.

There are a number of other factors that are contributing to the rapid growth of the world population. For example, the number of people who are surviving to old age has increased. This is because there are more people who are surviving to old age, and this means that there are more people in the world who are old enough to have children.

The first of these is the fact that the system is not a simple one. It is a complex system, and as such, it is not possible to understand it by looking at its parts in isolation. The system is a whole, and its behavior is determined by the interactions between its parts. This is a fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The second of these is the fact that the system is dynamic. It is not a static system, and its behavior changes over time. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The third of these is the fact that the system is open. It is not a closed system, and it interacts with its environment. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The fourth of these is the fact that the system is self-organizing. It is not a system that is controlled from the outside, and it is not a system that is designed from the top down. It is a system that organizes itself, and its behavior emerges from the interactions between its parts. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The fifth of these is the fact that the system is resilient. It is not a system that is fragile, and it is not a system that is easily disrupted. It is a system that is able to withstand change, and it is able to adapt to new circumstances. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The sixth of these is the fact that the system is sustainable. It is not a system that is unsustainable, and it is not a system that is doomed to failure. It is a system that is able to continue to exist, and it is able to thrive. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The seventh of these is the fact that the system is equitable. It is not a system that is unfair, and it is not a system that is biased. It is a system that is fair, and it is one that is able to provide for the needs of all its members. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The eighth of these is the fact that the system is just. It is not a system that is unjust, and it is not a system that is oppressive. It is a system that is just, and it is one that is able to provide for the needs of all its members. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The ninth of these is the fact that the system is peaceful. It is not a system that is violent, and it is not a system that is warlike. It is a system that is peaceful, and it is one that is able to provide for the needs of all its members. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The tenth of these is the fact that the system is harmonious. It is not a system that is disharmonious, and it is not a system that is in conflict. It is a system that is harmonious, and it is one that is able to provide for the needs of all its members. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The first of these is the fact that the system is not a simple one. It is a complex system, and as such, it is not possible to understand it by looking at its parts in isolation. The system is a whole, and its behavior is determined by the interactions between its parts. This is a fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The second of these is the fact that the system is dynamic. It is not a static system, and its behavior changes over time. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The third of these is the fact that the system is open. It is not a closed system, and it interacts with its environment. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The fourth of these is the fact that the system is self-organizing. It is not a system that is controlled from the outside, and it is not a system that is designed from the top down. It is a system that organizes itself, and its behavior emerges from the interactions between its parts. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The fifth of these is the fact that the system is resilient. It is not a system that is fragile, and it is not a system that is easily disrupted. It is a system that is able to withstand change, and it is able to adapt to new circumstances. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The sixth of these is the fact that the system is sustainable. It is not a system that is unsustainable, and it is not a system that is doomed to fail. It is a system that is able to continue to exist, and it is able to thrive. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The seventh of these is the fact that the system is equitable. It is not a system that is unfair, and it is not a system that is biased. It is a system that is fair, and it is one that is able to provide for the needs of all its members. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The eighth of these is the fact that the system is just. It is not a system that is unjust, and it is not a system that is oppressive. It is a system that is just, and it is one that is able to provide for the needs of all its members. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The ninth of these is the fact that the system is peaceful. It is not a system that is violent, and it is not a system that is warlike. It is a system that is peaceful, and it is one that is able to provide for the needs of all its members. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The tenth of these is the fact that the system is harmonious. It is not a system that is disharmonious, and it is not a system that is in conflict. It is a system that is harmonious, and it is one that is able to provide for the needs of all its members. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The first part of the paper discusses the importance of the research and the objectives of the study. It then moves on to a literature review, which provides a background on the topic and identifies the gaps in the existing research. The methodology section describes the research design, data collection, and analysis. The results section presents the findings of the study, and the conclusion summarizes the main points and offers suggestions for future research.

The research was conducted in a systematic and rigorous manner, following the principles of good research practice. The data were collected from a representative sample of the population, and the analysis was carried out using appropriate statistical methods. The results of the study are presented in a clear and concise manner, and the conclusions are based on the evidence gathered.

The study has several strengths, including a well-defined research design, a large and diverse sample, and the use of advanced statistical techniques. However, there are also some limitations, such as the cross-sectional nature of the data and the potential for self-report bias. Despite these limitations, the study provides valuable insights into the topic and contributes to the existing knowledge in the field.

In conclusion, the research highlights the importance of the topic and the need for further investigation. The findings suggest that there are significant differences between the groups studied, and these differences may be related to the factors examined. The study also identifies areas for future research, such as the need for longitudinal data and the exploration of the underlying mechanisms.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has become a major employer in the UK, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office of National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 3.5 million (Office of National Statistics 1999).

There is a growing awareness of the need to address the health care needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' of health care for the ageing population, one that is based on a 'new paradigm' of health care for the ageing population, one that is based on a 'new paradigm' of health care for the ageing population.

The new paradigm of health care for the ageing population is based on a number of key principles. First, it is based on the principle of 'person-centred care', which means that the health care provider should take into account the individual's needs, preferences, and values. Second, it is based on the principle of 'holistic care', which means that the health care provider should consider the individual's physical, mental, and social health. Third, it is based on the principle of 'preventive care', which means that the health care provider should focus on preventing illness and promoting health.

The new paradigm of health care for the ageing population is based on a number of key principles. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the health and quality of life of older people. The strategy is based on three main principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in the activities of their communities.

The strategy is based on three main principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in the activities of their communities. the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There is a significant increase in the number of people in the world who are aged 15 years and over, and a significant decrease in the number of people in the world who are under 15 years of age. This is a significant change in the world's population structure, and it is a change that has not been seen for many years.

The number of people in the world who are aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999. The number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999.

The number of people in the world who are aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999. The number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999.

The number of people in the world who are aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999. The number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999.

The number of people in the world who are aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999. The number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999.

The number of people in the world who are aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999. The number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999.

The number of people in the world who are aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999. The number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 2001). The number of people who are malnourished has increased from 1.1 billion in 1990 to 1.5 billion in 2000 (FAO 2001). The number of people who are obese has increased from 100 million in 1975 to 300 million in 2000 (WHO 2000).

There is a need to understand the factors that influence the development of obesity and malnutrition. The aim of this paper is to review the literature on the factors that influence the development of obesity and malnutrition. The paper will focus on the factors that influence the development of obesity and malnutrition in children and adolescents. The paper will also discuss the implications of the findings for the development of interventions to prevent and treat obesity and malnutrition.

Obesity and malnutrition

Obesity is a condition in which a person has an excessive accumulation of body fat. Malnutrition is a condition in which a person does not have enough of the nutrients that are needed for good health. Both obesity and malnutrition are common problems in children and adolescents.

Obesity and malnutrition are both conditions that can lead to a number of health problems. Obesity can lead to heart disease, diabetes, and high blood pressure. Malnutrition can lead to stunted growth, weakened immunity, and a number of other health problems.

There are a number of factors that can influence the development of obesity and malnutrition. These factors include genetics, diet, and physical activity. The following sections will discuss each of these factors in more detail.

Genetics can play a role in the development of obesity and malnutrition. Some people are genetically predisposed to be obese or malnourished. Diet and physical activity can also play a role in the development of obesity and malnutrition.

Diet is a major factor in the development of obesity and malnutrition. A diet that is high in calories and fat can lead to obesity. A diet that is low in calories and nutrients can lead to malnutrition.

Physical activity is another major factor in the development of obesity and malnutrition. A lack of physical activity can lead to obesity. Regular physical activity can help to prevent obesity and malnutrition.

There are a number of interventions that can be used to prevent and treat obesity and malnutrition. These interventions include changes in diet, changes in physical activity, and changes in the environment.

the first of these is the fact that the majority of the population is now living in urban areas. This has led to a concentration of people in a few large cities, which has in turn led to a number of problems. One of the most serious is the lack of adequate housing. In many of these cities, the housing is of a very poor quality and is often overcrowded. This has led to a number of health problems, particularly in the case of children. Another problem is the lack of adequate sanitation. In many of these cities, there is no proper sewage system, and the waste is often dumped in the streets. This has led to a number of diseases, particularly in the case of children. A third problem is the lack of adequate education. In many of these cities, there are no schools, and the children are often left to fend for themselves. This has led to a number of social problems, particularly in the case of children.

The second of these is the fact that the majority of the population is now living in rural areas. This has led to a number of problems. One of the most serious is the lack of adequate housing. In many of these areas, the housing is of a very poor quality and is often overcrowded. This has led to a number of health problems, particularly in the case of children. Another problem is the lack of adequate sanitation. In many of these areas, there is no proper sewage system, and the waste is often dumped in the streets. This has led to a number of diseases, particularly in the case of children. A third problem is the lack of adequate education. In many of these areas, there are no schools, and the children are often left to fend for themselves. This has led to a number of social problems, particularly in the case of children.

The third of these is the fact that the majority of the population is now living in semi-urban areas. This has led to a number of problems. One of the most serious is the lack of adequate housing. In many of these areas, the housing is of a very poor quality and is often overcrowded. This has led to a number of health problems, particularly in the case of children. Another problem is the lack of adequate sanitation. In many of these areas, there is no proper sewage system, and the waste is often dumped in the streets. This has led to a number of diseases, particularly in the case of children. A third problem is the lack of adequate education. In many of these areas, there are no schools, and the children are often left to fend for themselves. This has led to a number of social problems, particularly in the case of children.

The fourth of these is the fact that the majority of the population is now living in coastal areas. This has led to a number of problems. One of the most serious is the lack of adequate housing. In many of these areas, the housing is of a very poor quality and is often overcrowded. This has led to a number of health problems, particularly in the case of children. Another problem is the lack of adequate sanitation. In many of these areas, there is no proper sewage system, and the waste is often dumped in the streets. This has led to a number of diseases, particularly in the case of children. A third problem is the lack of adequate education. In many of these areas, there are no schools, and the children are often left to fend for themselves. This has led to a number of social problems, particularly in the case of children.

The fifth of these is the fact that the majority of the population is now living in mountainous areas. This has led to a number of problems. One of the most serious is the lack of adequate housing. In many of these areas, the housing is of a very poor quality and is often overcrowded. This has led to a number of health problems, particularly in the case of children. Another problem is the lack of adequate sanitation. In many of these areas, there is no proper sewage system, and the waste is often dumped in the streets. This has led to a number of diseases, particularly in the case of children. A third problem is the lack of adequate education. In many of these areas, there are no schools, and the children are often left to fend for themselves. This has led to a number of social problems, particularly in the case of children.

The sixth of these is the fact that the majority of the population is now living in desert areas. This has led to a number of problems. One of the most serious is the lack of adequate housing. In many of these areas, the housing is of a very poor quality and is often overcrowded. This has led to a number of health problems, particularly in the case of children. Another problem is the lack of adequate sanitation. In many of these areas, there is no proper sewage system, and the waste is often dumped in the streets. This has led to a number of diseases, particularly in the case of children. A third problem is the lack of adequate education. In many of these areas, there are no schools, and the children are often left to fend for themselves. This has led to a number of social problems, particularly in the case of children.

[The following text is a dense, continuous block of illegible characters and symbols, likely representing a corrupted or redacted document. It contains no discernible words or structure.]

- 100

[The following text is a dense, continuous block of illegible characters, likely representing a scanned document page where the text is too blurry to be transcribed accurately. It appears to be a single paragraph of text.]

[The following text is a dense, handwritten manuscript, likely a letter or a page from a book. It is written in a cursive script and is mostly illegible due to the quality of the scan. The text appears to be a continuous paragraph or a series of connected thoughts. The handwriting is fluid and somewhat slanted. There are some words that are more legible than others, but the overall content cannot be accurately transcribed. The text is written in dark ink on a light-colored paper. The page number '100' is visible in the top left corner. The text is centered on the page. The handwriting is consistent throughout the page, suggesting it was written by a single person. The overall appearance is that of a historical document or a personal letter.]
